

Help Stop the Spread of Flu Germs

The most effective means to reduce the incidence of cross infection resulting in the transmission of bacteria by hand-to-hand, hand-to-surface then hand-to-face contact remains thorough and consistent hand washing. Each year millions of school and work days are missed because of the cold and flu season.

Touchless towel dispensers, antibacterial soaps and sanitizers are just a few ways your facility can help stop the spread of bacteria.

*Ask your A1 service representative
about our antibacterial soaps and sanitizers.*
